

Synology Products Compatibility List

Synology has been striving to improve product compatibility to various drives, USB devices and network peripherals. We recommend checking out our compatibility list before purchasing the peripherals you need.

- Compatible storage drives
- Compatible accessories
- Full accessory compatibility list

Select your system

Find verified storage drives compatible with your Synology product(s).

HDD/SSD via Internal Slot

Third-party products and peripherals on this list have been tested and verified by Synology. Please note firmware or hardware changes may affect device compatibility and stability. Synology does not guarantee compatibility with listed products and reserves the right to update the list at any time. [Learn more](#)

Synology will not provide technical support if your device is not on the Synology Products Compatibility List.

- Always use and manage 4K native (4Kn) hard drives separately.
- Always install enterprise-class drives on FS/HD/SA/UC/XS+/XS Series models for full support and optimal performance.
- Click to learn more about [incompatible models](#).
